

# Drawing Closer - Online Drawing Development Year Exhibition

An exhibition of works by the 2025 cohort of the Online Drawing Development Year programme; showcasing a diversity of approaches, influences, and visual language.

## About This Event

The Online Drawing Development Year students dedicate themselves to slowing down and drawing from observation. Whether studying the figure, interior space, abstract landscape, or everyday objects, students have approached their subjects with imagination, discipline, and curiosity.

This exhibition celebrates the culmination of their online experience to bring their work together for the first time. We invite you to experience the diversity of approaches, influences, and visual languages that have evolved within this geographically dispersed yet connected cohort.
